

CHECKFLUID Sampling Solutions

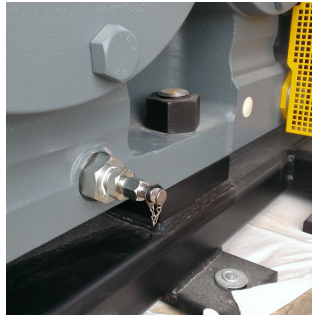

PRESSURIZED SAMPLING

- Pushbutton or probe-style sampling valves for pressurized sampling (engines, compressors, hydraulics etc)
- Get reliable oil samples often in less than a minute

NON-PRESSURIZED SAMPLING

- High-flow, flush-face oil sampling valves for gearboxes and reservoirs
- Permanent sampling tube draws oil only from the active zone
- Often save 15 minutes sampling compared to other methods

SAMPLING & CONDITION MONITORING

- Checkfluid's CORE Solution covers the functions you need for total fluid management of your gearbox or reservoir
- It combines the AD Drain Mount and AB Breather Mount to allow you to sample, filter, drain, fill and monitor all without opening your equipment

NEW VACUUM CHARGED SAMPLING

- Vacuum charged bottles are ready to draw an oil or coolant sample in seconds
- Probes available for different Checkfluid valve series
- Currently available in North America only

CHECKFLUID Sampling Solutions

APPLICATION	PRESSURIZED OR NON-PRESSURIZED	RECOMMENDED VALVE SERIES
ENGINE	PRESSURIZED	KP PUSHBUTTON
HYDRAULIC RETURN LINE	PRESSURIZED	KP PUSHBUTTON
HYDRAULIC PRESSURIZED LINE	PRESSURIZED	KST SERIES
COMPRESSOR	PRESSURIZED	KP PUSHBUTTON
GENERATOR	PRESSURIZED	KP PUSHBUTTON
TRANSMISSIONS	PRESSURIZED	KP PUSHBUTTON
TURBINES	PRESSURIZED	KP PUSHBUTTON
GEARBOX	NON-PRESSURIZED	LTJ SERIES
RESERVOIR	NON-PRESSURIZED	LTJ SERIES
FINAL DRIVE	NON-PRESSURIZED	LE SERIES
CIRCULATING LUBE LINE	LOW PRESSURE	LP PUSHBUTTON

Not all applications and sampling solutions are listed. Checkfluid has innovative solutions for challenging applications. Call 1-519-652-6373 or click the link below to discuss your oil sampling needs
